

The Technology & Talent to Optimize Outcomes in Your OR

Too often, the surgical equipment designed to move you toward improved outcomes leaves your patients waiting and OR teams expecting more. In fact, most ORs lack the time, process or trained technical talent needed to effectively optimize the use of their surgical lasers across their hospital or IDN—often increasing case delays, cutting into ROI and leading to patient and staff frustration. UHS solves these challenges by giving OR staff access to best-in-class technology, certified and experienced laser operators and proven laser safety processes to ensure compliance, maximize OR throughput and provide an optimal patient experience.

Drive OR efficiency and optimal outcomes with surgical equipment solutions from UHS. We offer a full complement of cutting-edge technology and technical talent to ensure you meet the variable case demands of your OR.

DRIVING MEASURABLE IMPROVEMENTS

IMPROVE O.R. EFFICIENCY 

REDUCE PATIENT RISK 

OPTIMIZE CAPITAL & RENTAL COSTS 

UHS offers a range of surgical equipment solutions. Each offering includes access to online case scheduling, aggregated laser log documentation and actionable data and analytics to help drive a more efficient and profitable OR.

Surgical Equipment Rental

UHS provides state-of-the-art surgical lasers and equipment to support positive outcomes for both your patients and your business. We handle all cleaning, maintenance, disposables and compliance. UHS also provides experienced and certified technicians to ensure optimal equipment operation during every case.

Tech Only Services

For owned equipment, UHS can provide highly experienced and certified technicians to operate mobile surgical lasers and other specialty surgical equipment. This reduces the risk and burden of your OR staff assisting the operation of devices without dedicated training.

On-Site Management Program

A complete surgical equipment management solution: the latest technology in the UHS fleet, highly trained technicians and equipment logistics experts—all on site, ready to meet dynamic and emergent case needs. Take equipment optimization and OR efficiencies to the next level.

IDN Optimization Program

The variable use of surgical equipment can make it difficult to optimize the use of each device at the IDN level. UHS provides a specialized analytics and operational solution to optimize equipment utilization, lower cost-per-case and maximize ROI across your network of hospitals.

Surgical Technology Portfolio

Per-case access to a complete range of best-in-class surgical equipment. We adhere to the highest industry and patient safety standards for managing, maintaining and operating surgical technology—covering more than 70,000 cases every year.

AESTHETIC SURGERY	CARDIAC SURGERY	ENT
GASTROENTEROLOGY	GENERAL SURGERY	GYNECOLOGY
MINIMALLY INVASIVE IR	NEUROSURGERY	ONCOLOGY
OPHTHALMOLOGY	ORTHOPEDICS SURGERY	PODIATRY
PULMONOLOGY	UROLOGY	VASCULAR

About UHS

We offer a full range of equipment-based services, including rental, on-site managed services and clinical engineering services. Working side-by-side with clinicians, supply chain teams and clinical engineers in more than 7,000 locations gives us a unique perspective on medical equipment management. We believe optimizing patient outcomes and driving meaningful operational savings requires an end-to-end approach. So, we offer solutions that connect departments, fix fragmented processes and free health care professionals to focus on what they do best — providing exceptional care and best-in-class patient experiences. For information on how we do this, visit www.uhs.com.
